PROJECTS

ViQuiz Game

06 2023

- ViQuiz is an innovative online quiz platform that uses Python and OpenCV to enable virtual participation through visual-based interactions.
- As a Front-End Developer, I led the implementation of a dynamic web interface using HTML, CSS, and JavaScript. **Feasibility:** Leverage advanced technology for efficient, cost-effective distribution with top security.

Words-Well

04 2024

- WordWell, a dictionary platform developed as a solo project.
- I also handled the backend development, using an external API for dictionary data to provide full functionality and a great user experience.

PawsVeda-E-Commerce Platform Angular, HTML, CSS, Js, Node.js, Express, MongoDB

06 2024

- Developed a comprehensive digital platform for virtual veterinary consultations, tailored pet health information, and a dynamic pet supply marketplace. Optimized user experience with intuitive UI design, responsive functionality, and seamless backend integration.
- Empowered shopkeepers to increase product sales through the platform's effective reach and engagement tools.

COURSEWORK

- | | | | |
